

AeroCatch®

COUNTERFEIT (FAKE) COMPARISON

The figures below are verified by a UK Test House and shows a comparison between the strengths of AeroCatch and that of 3 different counterfeits (Fakes).

The result are for one single catch fitted to a bonnet at a time with the factory bonnet latch disconnected.

The figures show the force applied to a car bonnet being opened whilst the AeroCatch is in the closed position

Figures show when the catch failed.

AeroCatch 637.5 kilogram-force = 1405.5 pound-force

Fake one 154.5 kilogram-force = 340.8pound-force

Fake two 172.8kilogram-force = 381.0 pound-force

Fake three 174.3 kilogram-force = 384.4 pound-force

The results show that AeroCatch is on average 75% STRONGER than the fakes
